

HEALTHCARE DEVELOPMENTS - BARNES JEWISH HOSPITAL - Dr. Damiano Lab Renovation

The project consisted of the complete renovation of a motion analysis laboratory and physician office. This 1500 square foot space was redesigned to maintain a functional physical therapy lab where pediatric physicians examine and analyze motor disorders in children.

Kwame Building Group, Inc. provided general contracting/construction management at-risk services for the renovation of the lab. This consisted of scheduling, estimating and cost reporting. As the general contractor we provided carpentry services while sub contracting out the mechanical and electrical work.

Construction Cost: \$80,000
Completion Date: 2003
