

## LAMBERT-ST. LOUIS INTERNATIONAL - AIRPORT MASTER PLAN SUPPLEMENT

**KWAME** served as a planning consultant to develop a Master Plan Supplement for Lambert-St. Louis International Airport.

In the Master Plan Supplement Study, we refined representative alternatives, prepared cost estimates and evaluated construction factors. The study also included an evaluation of airspace obstructions and jurisdictional factors.

Our work on the Master Plan Supplement provided a strategic guide for Lambert's future development. We also identified changes that needed to be made including lengthening the runway, revising airfield elevations to balance earthwork requirements, adding stormwater detention areas, realigning roadways and revising land/use facilities.

**Construction Cost:** \$1.5 million  
**Completion Date:** 1996

**Client Contact:**
